

COMPLETE ELECTRONIC PRODUCT ASSEMBLY & SYSTEM INTEGRATION

Kingway helps transform electronic designs into finished products.

COIN CELL BATTERIES • SECONDARY BATTERIES • PCB ASSEMBLY • ENGINEERING SERVICES
SILICONE, METAL, & INJECTION MOLDED COMPONENTS • CONNECTORS • HARNESSES • & MORE!

BOX BUILD ASSEMBLY

Box Build Assembly (also known as System Integration) brings together all electronic and mechanical components into a fully assembled product.

Kingway provides complete box build assembly services that combine circuit boards, wiring, mechanical components, and enclosures into finished products.

Through our global manufacturing network and assembly partners, Kingway helps companies streamline production by coordinating multiple components and manufacturing processes into a single integrated solution.

COMPLETE PRODUCT ASSEMBLY

Kingway supports **full product assembly** for a wide variety of electronic and electromechanical products.

- PCB installation and system integration
- Internal wiring and cable harness installation
- Mechanical component and enclosure assembly
- Display modules and user interface components
- Power supply and battery integration

These assemblies **combine multiple components into reliable finished products** ready for testing, packaging, and shipment.

COMPONENT INTEGRATION

Kingway's **sourcing expertise** allows coordination of components required to **complete complex products**.

- Printed circuit board assemblies (PCBA)
- Wire harnesses and cable assemblies
- Injection molded housings and mechanical parts
- Connectors, switches, and interface components
- Batteries and power management systems

This integrated approach **reduces complexity** and ensures all components are compatible within the final product design.

APPLICATIONS:

- Consumer Electronics • Industrial Control Systems • Medical Devices • Smart Products
Automotive Electronics • IoT Devices • Electronic Modules
